

**CONFIDENTIAL**

DIRECTOR OF CENTRAL INTELLIGENCE  
**Scientific and Technical Intelligence Committee**

4 AUG 1982

MEMORANDUM FOR: Walter Elder  
Executive Secretary, NFIB

FROM: [REDACTED]  
Chairman, STIC

SUBJECT: STIC Use of DOE National Laboratory  
Personnel

REFERENCE: Memo IC 18215542, 29 July 1982, Use of  
Contract Employees

1. The STIC has 13 Department of Energy National Laboratory people on its working groups and its subcommittee. In general, the people make an outstanding contribution to the working group process. They provide expertise in several areas that is not available anywhere else in the Intelligence Community. [REDACTED]

2. Our working groups have encountered no apparent conflict of interest in using National Laboratory personnel. These people are, for the most part, from intelligence shops at the National Laboratories and do not compete with the private sector for intelligence analysis contracts. The others are engaged in research, such as particle beam weapons technology, where there is little if any private sector work. [REDACTED]

3. I feel that the STIC should continue to use DOE National Laboratory people as if they were full-time government employees until the time that DOE Headquarters personnel can fully support the STIC [REDACTED]

[REDACTED]
